PROFILE

I am an experienced game developer dedicated to creating engaging, narrative-driven experiences. I am currently developing Haunted Cleaner, a personal project that is a light puzzle and narrative game, alongside my role as an HTML5 Game Developer. I hold a master's degree in Media Computing and have strong technical skills in Godot and PixiJS.

I thrive in collaborative environments that encourage innovation and focus on delivering high quality games that appeal to players. As I advance in my career, I am committed to further improving my skills in 3D development and expanding my knowledge as a technical artist.

EXPERIENCE

HTML5 Game Developer

SOFTGAMES - Mobile Entertainment Services GmbH

📅 Dec 2022 - Present

📍 Berlin, Germany

- Developed gameplay mechanics and tools for a narrative-focused 2D solitaire card game.
- Managed LiveOps, including seasonal passes and recurring in-game events to enhance player engagement and retention.
- Collaborated within a 30-person multidisciplinary team, contributing to a development team of 6 engineers.

PROJECTS

Haunted Cleaner - HeadKino

- Lead developer on a relaxing light puzzle and narrative personal game project about tidying up the rooms of the deceased and uncovering their stories, developed using Godot.

Solitaire Home Story - SOFTGAMES

- Core developer on a 2D solitaire card game, implementing gameplay features, animations, UI, LiveOps, and a difficulty system.
- Created a shared level editor used across multiple solitaire games within the company.

Master thesis

- Developed a difficulty estimation system for a solitaire card game, utilizing Monte Carlo tree search and neural networks to predict level difficulty.
- Implemented automated play-throughs to gather data, assessing the challenge of levels prior to release.

Gravity Warrior - University project

- Created a 2D couch-coop twin-stick shooter as a university project in a team of four, utilizing the Godot game engine.
- Players control one of four characters equipped with jet packs and plasma guns, navigating a gravity-driven environment.
