## PROFILE

I am a game designer interested in cozy, low-stress games that focus on narrative and atmosphere. I enjoy finding the right mechanics to support a story or mood, and I like working on projects where design and storytelling go hand in hand.

I have a solid technical background in Godot and PixiJS and like collaborating closely with others, especially in small, creative teams. Lately, I've been exploring more 3D development and getting deeper into technical art to support my design work.

## EXPERIENCE

### Game Designer & Co-Founder

#### HeadKino Games

📅 Mar 2025 - Present 📍 Berlin, Germany

- Co-founding an game studio to develop *Haunted Cleaner*, a narrative-driven indie game.
- Serving as co-designer, responsible for game design, story development, and the creation of gameplay systems. Developed using Godot and supported by Medienboard Berlin-Brandenburg.

### Game Developer

#### SOFTGAMES - Mobile Entertainment Services GmbH

📅 Dec 2022 - Mar 2025 📍 Berlin, Germany

- Developed gameplay mechanics and tools for a narrative-focused 2D solitaire card game and color matching tile puzzle game.
- Collaborated within a 30-person multidisciplinary team, contributing to a development team of 6 engineers.

### Lecturer

#### University Applied Sciences, Berlin

📅 May 2023 - Feb 2024 📍 Berlin, Germany

- Introductory game development course on the International Media Computing masters programme.

### Junior Game Developer

#### SOFTGAMES - Mobile Entertainment Services GmbH

📅 Jan 2020 - Sep 2022 📍 Berlin, Germany

### Working Student - App Development

#### h3ko Vertriebsgesellschaft mbH

📅 Jun 2016 - Dec 2019 📍 Berlin, Germany

## EDUCATION

### M.Sc. Media Computing

#### University of Applied Sciences, Berlin

📅 2018 - 2022 📍 Berlin, Germany

### Exchange Computer Science

#### Norwegian University of Science and Technology

📅 2020 📍 Trondheim, Norway

### B.Sc. Applied Computer Science

#### University of Applied Sciences, Berlin

📅 2015 - 2018 📍 Berlin, Germany

### Vocational Diploma

#### Berlin College of Further Education for Information and Medical Technology

📅 2014 📍 Berlin, Germany

## PROJECTS

### Haunted Cleaner - HeadKino Games

- Co-Designing a narrative-focused 3D cozy indie game about grief, memory, and personal storytelling.
- Players tidy the rooms of the deceased and uncover emotional layers through environmental storytelling, visual composition, and light puzzle mechanics. Designed with a focus on cozy aesthetics and a gentle pacing.

### Gravity Warrior - University Project

- Designed a 2D local co-op twin-stick shooter in a team of four, developed in Godot as part of a university project.
- Players traverse gravity-shifting asteroids with jetpacks and plasma weapons, facing off against waves of alien enemies in a fast, chaotic, and collaborative combat experience.

### Hexa Stack - SOFTGAMES

- Programmer of core gameplay systems for a hexagon-based puzzle game focused on stacking, sorting, and matching.
- Implemented booster and blocker functionality, contributed to UI development and shop logic.

### Solitaire Home Story - SOFTGAMES

- Core developer of a 2D solitaire card game, implementing gameplay features, animations, UI, LiveOps, and a difficulty system.
- Created a shared level editor that is used in multiple solitaire games within the company.
